

COMPUTER SCIENCE PROJECT DOCUMENTATION OUTLINE

Declaration

Dedication

Acknowledgment

Abstract (should be summary in ONE paragraph)

Table of Contents

Chapter 1: Introduction

- • Background of project
- • Problem Statement
- • Aim of the project
- • Specific project objectives
- • Scope of the project
- • Project limitations
- • Academic and practical relevance of the project
- • Beneficiaries of the project
- • Project activity planning (Use the appropriate project management tool)
- • Definitions and explanations of terms
- • Structure of report

Chapter 2: Literature Review/ Review of Related Systems

(Students are expected to review at least three (3) similar systems)

- **Review of system 1** :(INSERT NAME OF SYSTEM)

1. DESCRIPTION OF SYSTEM

- ✓ Overview of the system
- ✓ Models of the system (Context model, interaction model (sequence diagram), structural model, and behavioral model). NB: use the appropriate UML diagram.
- ✓ Features of the system
- ✓ Development tools and development environment of the system

2. REVIEW OF THE GOOD FEATURES

3. REVIEW OF THE BAD FEATURES

4. SUMMARY OF THE SYSTEM REVIEW

- **Review of system 2** :(INSERT NAME OF SYSTEM)

1. DESCRIPTION OF SYSTEM

- ✓ Overview of the system
- ✓ Models of the system (Context model, interaction model (sequence diagram), structural model, and behavioral model). NB: use the appropriate UML diagram.
- ✓ Features of the system
- ✓ Development tools and development environment of the system

2. REVIEW OF THE “GOOD” FEATURES

3. REVIEW OF THE “BAD” FEATURES

4. SUMMARY OF THE SYSTEM REVIEW

- **Review of system 3** :(INSERT NAME OF SYSTEM)

1. DESCRIPTION OF SYSTEM

- ✓ Overview of the system
- ✓ Models of the existing system (Context model, interaction model (sequence diagram), structural model, and behavioral model). NB: use the appropriate UML diagram.
- ✓ Features of the system
- ✓ Development tools and development environment of the system

2. REVIEW OF THE GOOD FEATURES

3. REVIEW OF THE BAD FEATURES

4. SUMMARY OF THE SYSTEM REVIEW

- **Review of system 4** :(INSERT NAME OF SYSTEM)

1. DESCRIPTION OF SYSTEM

- ✓ Overview of the system
- ✓ Models of the system (Context model, interaction model (sequence diagram), structural model, and behavioral model). NB: use the appropriate UML diagram.
- ✓ Features of the system
- ✓ Development tools and development environment of the system

2. REVIEW OF THE GOOD FEATURES

3. REVIEW OF THE BAD FEATURES

4. SUMMARY OF THE SYSTEM REVIEW

Chapter 3: (a) Methodology

- Introduction
- Use the appropriate software Development process models (Plan driven or Agile)
- Give justification for the chosen software development process model (Plan driven or agile)
- Outline the details of the chosen software process model
- Provide a detailed description of the activities (you embarked on) in each phase of the chosen software development process model.

(b). Proposed System

- Introduction of Proposed System
- Models of the proposed system (Context model, interaction model (sequence diagram), structural model, and behavioral model). NB: use the appropriate UML diagram.
- New Features of the proposed system
Development tools and development environment of the proposed system
- ✓ Features of the system
✓ Development tools and development environment of the system
- REVIEW OF THE GOOD FEATURES
- REVIEW OF THE BAD(if any) FEATURES
SUMMARY OF THE SYSTEM REVIEW

Chapter 4: Implementation, Testing, and Results

- • Introduction
- • Mapping logical design onto the physical platform (system development)
- • System Modules Implementation (UI, DB, etc)
- • System Modules Integration
- Testing
- Testing plan
- Verification Testing
- Validation Testing
- System security testing
- Recommendations made by testers
- Responses to recommendations from testing

Chapter 5: Findings, Conclusions, and Recommendations

- • Introduction
- • Findings
- • Conclusions
- • Challenges
- • Lesson learnt
- • Recommendations for future works
- • References
